FRONT OPTIONS

#### SSF (Front) & SSR (Rear) Part Numbers

SumoSprings are a suspension enhancement built to create a better journey.

Manufactured from our micro-cellular polyurethane, they are designed to reduce rear-end sag, decrease vibration, stabilize sway, and soften harsh rebounds.

#### **CSS** Part Numbers

Coil SumoSprings improve the load leveling ability of original equipment front and rear coil springs.

Produced from SumoSprings closed micro-cellular urethane, they install by simply being slid between the turns of the coil spring.
